

Harnesses EN 361, EN 358 & EN 813

Tractel offers a wide range of harnesses to meet your requirements from the best selling entry level HT22 to the patented technical Easyclimb™ harness.

Many of our harnesses now come with the revolutionary Elastrac™ option.

What is Elastrac™?

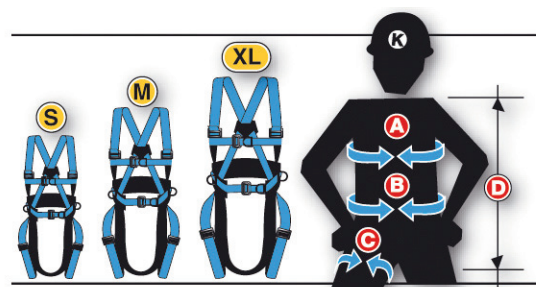

Elastrac™ harnesses are a new generation of harness that offer maximum comfort, practicality and safety. The unique patented system means that the harnesses are equipped with special packs which allow for 4cm of movement. These packs adapt the elongation of the harness straps to the users body shape, stretching the straps with each movement.

Why Elastrac™?

- Increased comfort – adapts to the users body movements
- Increased practicality – 4cm of extra movement perfect for active work situations
- Increased safety – safer than an elastic harness as fall distance is dramatically reduced.

Harness size guides - entire range

	S cm	M / L cm	XL cm
A	60-100	80-120	100-160
B	75-100	90-110	100-125
C	45-80	45-100	45-120
D	55-65	65-80	80-90
