TKG-VHS 'SELF WEIGHT' BALANCE CRANE FORKS

These TKG-VHS crane forks are equipped with adjustable tines, height adjustability & an automatic balancing system. Crane forks with automatic balancing* tend to point their tines upward when being transported. This prevents the load from unintentionally slipping off the tines.

The lifting eye is movable and runs up and down on a track depending on the load. The automatic balancing engages by a pressurised gas spring once the forks are loaded. The load will always be in the centre of gravity of the forks ensuring a safe transport.

- Comply to all current European Quality Standards.
- Factor of safety 4 : 1
- Maintenance free.
- Highly visible safety colour.
- For transporting rings or coils, simply push fork tines together.
- Easily adjustable tines for all pallet sizes.
- Supplied with chain for securing the load.

**NB: The automatic balancing system requires a minimum load of 20% of the crane forks working load limit.*
