

TSA 'LIGHT WEIGHT' BLOCK GRAB

Block grab model TSA Capacities 250/500kg

The TSA block grab is useful for the transport of stone and concrete blocks, such as kerb stones as well as other materials with parallel surfaces. The grab has a protective lining to ensure a safe and non-marking transport.

The clamping jaw and the centre of gravity are easily and quickly adjustable by means of the locking pin.

Model	WLL kg	Jaw capacity mm	Weight kg	Price £
TSA 500	250/500	0 - 240	13.5	£617

NB: It is important that the surfaces are dry, clean and free of oil and grease.

TDI INSIDE COIL GRABS

The **TDI inside grabs** are specifically designed for the handling of cylindrical or rectangular objects such as coils or box section.

These grabs are available with three different jaw options dependant on your application. The jaw options available are: Profiled steel, case hardened serrated, or rubber protective lined.

For inside grabs with jaws with protective lining, the inside surface of the material being lifted must be free of oil and grease. When ordering please advise the jaw lining required.

* Model shown has profiled steel jaws

Model	WLL kg	Inside diameter mm	Weight kg	Price £
TDI 100	100	220 - 420	17	£1052
TDI 500	500	400 - 600	53	£1371
TDI 1000	1000	500 - 700	60	£1636

TPR 'LIGHT WEIGHT' PROFILE STEEL GRABS

The **TPR profile steel grabs** are specifically designed for the handling and transportation of steel girders in the 'I' configuration.

They boast a large jaw capacity, which makes them useful for various beam widths.

The clamping jaws press securely with a positive fit to the girder.

Model	WLL kg	Inside diameter mm	Weight kg	Price £
TPR 500	500	0 - 200	15	£515
TPR 1500	1500	0 - 300	24	£673
TPR 3000	3000	0 - 300	47	£917
