

Product ID:
RGH5 Glow

Product Name:
High Visibility Rescue Harness

The innovative RGH5 Glow is designed for use as a confined space access harness with new reflective yarn woven into the webbing - the first of its kind providing unprecedented levels of visibility in low light areas.

The front and rear attachment points can be used as standard fall arrest points. The rescue strap can be used for lifting and lowering, and also be used in certain fall arrest situations. High contrast stitching makes inspection easier.

The addition of a flexible rear D pad provides additional comfort. The inclusion of easy slide shoulder buckles increases the speed and range of adjustment. Tail tidies allow for convenient and neat storage of excess webbing following adjustment.

The way the harness has been designed minimises the amount of rigid webbing edges.

RGH5

Accredited to:

EN 361:2002
EN 1497:2007

Web material:

45mm water repellent polyester and high visibility

Fittings:

High tensile steel alloy

Weight:

1.2kg
